Flat Rate Proposal

This document is a proposal to review the current fee system and create a flat rate based on the country income and number of members for each association. The rates will change for most full members, but those who experience an increase will note that it is minimal. Currently regional members do not pay and sustaining and associate members will continue paying 100USD. Additionally, EU members within the MoU will not pay directly to WFPHA but to EUPHA. By introducing a flat rate it facilitates the ability for the federations to make online credit card payments, and creates a system which will be easier to control and moderate. Below the two tables show the proposed rates for developing and developed countries by membership numbers.

Developing Countries	
Membership	Rate (USD\$)
0-500	130
501-1000	200
1001-2000	250
2001+	500

Developed Countries	
Membership	Rate (USD\$)
0-500	300
501-1000	400
1001-2000	500
2001-3000	1000
3001+	3000

This table below shows the updated fees that each association will be paying. In order to accurately implement a flat rate system we based the figures on the number of members that each federation has, where this information was unavailable we took the numbers from previous invoices.

Notes

- (1) Increases in fees for these countries reflect their membership numbers. The fees are considered affordable for these associations.
- (2) Ethiopia has experienced a high increase but a request for a full or partial exemption (taking into account the incoming president in kind activity or the activities of the AFPHA secretariat) can be considered.
